

Document Manager Web Module

Document Manager Web is an important, secure business tool for efficiently publishing documents to remote colleagues and partners.

Publish your documents to the Web or your intranet. Provide trusted remote staff, customers and suppliers with secure access to selected documents.

Document Manager Web allows:

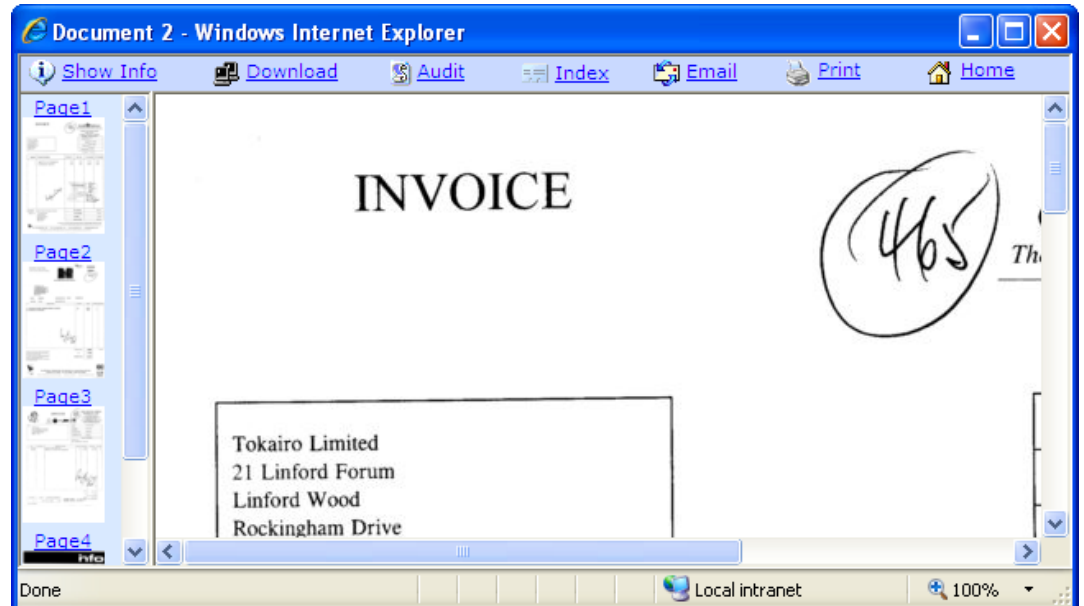

- Documents from a user to be published to the Internet, or their intranet, from their workstation, with full access security and permission control. The user can also manage workflow processes via a standard browser – without having Document Manager installed on their workstation.
- Users working in other system screens to have secure and immediate access to documents and folders from within Document Manager.
- Customers to comply with data protection legislation by tightly enforcing user access; auditing every user and system action.

The screenshot above shows the Web Module search screen. This is where the user enters the information to find the document that they want to retrieve.

Document Manager: Web Module

The screenshot below shows the results from the user search in a Web browser, which in this case is an image:

The Document Manager Web Module allows users to share knowledge with mobile staff, suppliers and customers.

As shown above, the simple search facility allows users to quickly locate and view any document for which they have access, to open multiple documents simultaneously and to download documents, if required.

Document Manager Web is an important, secure business tool for efficiently publishing documents to remote colleagues and partners.

Customise Document Manager Web's different screens to reinforce your own corporate identity. No workstation installation or software download is required to view image documents, whilst your support overheads are minimised. Document Manager enforces all user permissions, drawer, folder and document security centrally, at all times.

Only authorised documents, which the user has the permission to access, will be displayed within the Web browser.
