

Document Manager's powerful scanning engine ensures accurate and efficient indexing of large volumes of documents.

Accelerating Proof of Delivery (POD) capture to improve cashflow

For many businesses, inefficient Proof of Delivery document capture causes slow customer invoicing and subsequent high payment delays. To improve invoice processing and cashflow, businesses need to capture and manage their POD data in a timely accurate fashion.

Meeting the customers' demands for timely Proof Of Delivery requires a system that can provide on-demand, accurate data. Document Manager provides the robust system to meet those demands. Using Document Manager, businesses can reduce invoice processing time and improve billing cycles to increase cashflow.

Document Manager solves POD Management

Document Manager is designed to capture, store and process PODs more effectively, to accelerate invoice processing and improve cashflow.

Document Manager's powerful scanning engine ensures accurate and efficient indexing of large volumes of documents. Document Manager's flexible configuration tool simplifies indexing fields and folder structures. PODs can be captured immediately with accuracy. Document Manager can then present the PODs to internal and external users via a Web interface.

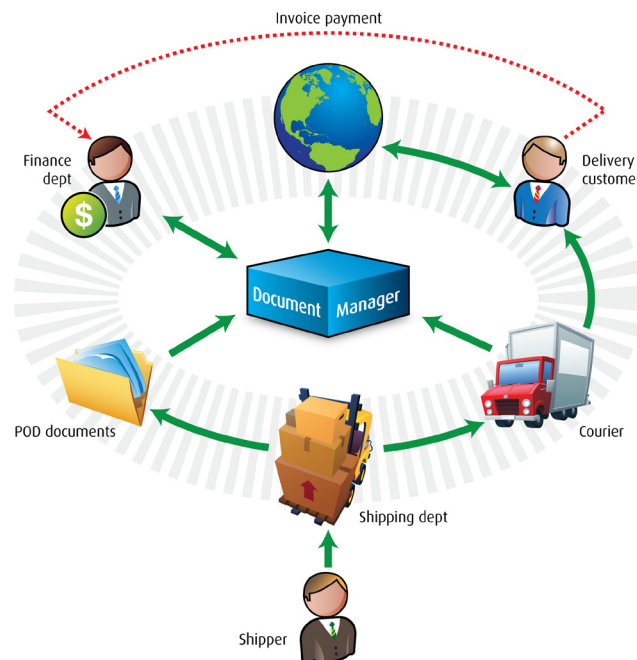

Document Manager integrates seamlessly with finance applications to enhance the invoicing process and provides missing POD reports to alert users to problems before they affect cashflow.

The powerful Document Manager configuration tool can be tailored to optimize business processes. POD management can be deployed from a central location or pushed to regional sites.

POD Management

Features and benefits

- High-volume, low-effort POD document capture
- Handles multiple document types and sizes
- Configurable indexing and folder setup
- Manual or fully automated indexing using optical character recognition (OCR)
- Workflow capabilities for standardized POD processing
- Presentation of POD information via Web interface
- Ability to meet customer SLAs
- Track missing PODs
- Reduction of payment cycle through POD tracking
- Integration with finance solutions for streamlined invoicing

Industry experience
